REPORTED COMMUNIST SUPPLY LOSSES IN CAMBODIA

The following are the cumulative results of US and ARVN operations in Cambodia. Losses are updated through 3 July 2200 hours EDT and include both - US and ARVN - inflicted supply losses. Cumulative losses by class of supply are as follows:

	Short Tons
Class I (food)	6,882
Class II and IV (weapons and equipment)	350* (300)
Class V (ammunition)	2,410 - 3,615** (1,880 - 2,820)
Total	9,642 - 10,847 (9,062 - 10,002)

* Including 160 (110) tons of weapons, down 10 tons, and 190 tons of clothing, medical supplies, communications gear, personal equipment, and explosives (other than ammunition). Excludes 1,237 tons of vehicles, down 86 tons, and 19 tons of POL. Totals are as of 2 July except for weapons.

** The higher range includes a crating and packaging allowance.

Note: Figures in parentheses are OER deflated estimates based on a revised methodology which utilizes weights for individual types of weapons and ammunition rather than factors for broad categories of those supplies.

DEVELOPMENTS DURING PAST 3-DAY REPORTING PERIOD
(25 June 2000 Hours EDT - 28 June 2000 Hours EDT)

A. The most significant weapons capture of the reporting period consisted of 1,890 individual weapons in Base Area 704. This total represents over 8% of the total individual weapons captured during the operation.

B. Rice captures in the Parrot's Beak ammounted to 110 tons; in Base Area 351, 47 tons of rice were uncovered.

C. The most significant captures of ammunition continue to be turned up in Base Area 351 where 38 tons were discovered during the reporting period. Nearly 60% of the increase consisted of rifle rounds.

Developments During the Past 24-Hour Reporting Period
(24 June 2000 Hours EDT - 25 June 2000 Hours EDT)

A. Weapons losses were heaviest in Base Areas 351 and 704. In Base Area 351, 105 individual and 52 crew-served weapons were uncovered; in Base Area 704, 262 individual weapons were found.

B. Rice losses in the Parrot's Beak amounted to 56 tons. Total rice captures increased only 45 tons, however, due to a decrease in the amount reported captured in Base Area 351.

C. Ammunition losses increased by 54 tons in Base Area 351. The total included 14 tons (26% by weight) of small arms ammunition, 3 tons of grenades, 20 tons (37%) of antiaircraft rounds, 6 tons of mortar rounds, 4 tons of rocket rounds, and 6 tons of recoilless rifle rounds.

Developments During the Past 24-Hour Reporting Period
(15 June 2000 Hours EDT - 16 June 2000 Hours EDT)

A. Losses incurred during the reporting period amounted to approximately 41 tons of supplies.

B. The bulk of those supplies consisted of 36 tons of rice captured in Base Area 351.

CIA Control No. 6896
16 June 1970

MEMORANDUM FOR: Lt. Comdr. Jonathan T. Howe
National Security Council Staff
The White House

SUBJECT : The Weapons Component of Cambodian Stockpiles Estimates

1. As you requested we have attempted to quantify the number of weapons included in our estimates of enemy stockpiles in Cambodia. We have found it impractical, if not impossible, to attempt to quantify specific weapons in the stockpiles and have settled on two categories -- of individual weapons and crew-served weapons. The available data and state of the art simply do not permit any greater precision. In fact the large number of variables in our data and our considerable uncertainties about the enemy stockpiles make it imperative that the figures presented below be understood simply as calculations and at this time certainly not be regarded as firm estimates. We are continuing to explore the problem in the hope of getting a better understanding of the impact of the enemy's weapon losses.

2. CIA estimates of enemy stockpiles in Cambodia of weapons and equipment (classes II and IV) include allowances for the following supplies:

a. Estimated enemy consumption of weapons in South Vietnam, including an allowance for replacing weapons because of normal wear, and re-equipping local enemy forces with more modern weapons.

b. Reported VC/NVA losses of weapons in South Vietnam which we assume the enemy must replace from stockpiles.

SECRET
Approved For Release 2004/11/30 : CIA-RDP78T02095R000200020001-5

Approved For Release 2004/11/30 : CIA-RDP78T02095R000200020001-5

c. Estimated consumption of other supplies -- quartermaster, signal, engineer, and so forth -- that the enemy must obtain from out of country (external) sources.

3. The weapons and equipment components of the total stockpile of these classes of supplies is given below in tons:

	Low Estimate	High Estimate
Weapons and Equipment	1600	2700
Weapons	565	950
Equipment	1035	1750

Weapons account for 35% of the estimated enemy stockpiles of weapons and equipment; the equipment component accounts for 65% of the total.

4. Assuming that the stockpiles in Cambodia consist of the same mix of individual and crew-served weapons as found in enemy units in South Vietnam, 565 tons and 950 tons of weapons are equivalent to the number of weapons shown below:

	Low Estimate	High Estimate
Tons	565	950
Individual Weapons	70,000	117,750
Crew-served Weapons	9,120	15,330

5. Through 14 June the Cambodian operations have picked up a reported 17,721 individual weapons and 2,330 crew-served weapons. These losses, when compared with stockpile estimates of the number of weapons in Cambodia, show that the Communists have lost from 15% to about 25% of their reserves of both individual and crew-served weapons (see tabulation below):

Reported Communist Supply Losses in Cambodia

The following are the cumulative results of US and ARVN operations in Cambodia. Losses are updated through 15 June 2000 hours EDT and include both US- and ARVN-inflicted supply losses. Cumulative losses by class of supply are as follows:

	Short Tons
Class I (food)	6,460
Class II and IV (weapons and equipment) *	318
Class V (ammunition)	2,077 - 3,116 **
Total	8,855 - 9,894

* Including 154 tons of weapons and 164 tons of clothing, medical supplies, communications gear, personal equipment, and explosives (other than ammunition). Excludes 964 tons of vehicles and 19 tons of POL. All totals except weapons are as of 14 June.

** The higher range includes a crating and packaging allowance.

MEMORANDUM FOR: Chief, Indochina Division

SUBJECT : Comments on R. Kaiser's Article in the Washington Post, "Red Strength Estimate Revised"

1. Kaiser's statement that nine percent of the ammunition captured in Fishhook and Parrot's Beak has been for small arms is inaccurate. As of 5 June 4.6 million rifle rounds (less than 50 cal.) had been recovered in these two areas compared with only 1.5 million machine gun rounds (50 cal or larger). Kaiser's statement may have been based on the mix of some caches within these areas, but in aggregate terms, the quantities of small arms rounds in both areas exceed the totals for machine gun rounds and larger.

2. As of 5 June 6,139 individual weapons had been seized in the Parrot's Beak and Fishhook areas. The 514 AK 47 assault rifles, reported by Kaiser as lost in these operations would comprise only 8% of the total. Our data show losses of AK 47 and CKC rifles in these two areas total about 3,200. If Kaiser is correct then about 2,700 if these weapons are CKG (or SKS) rifles. Kaiser's figures cannot be confirmed since we lack a breakout on AK 47's and CKC's in these operations.

Developments During the Past 24-Hours Reporting Period
(1 June 2000 Hours - 2 June 2000 Hours)

The increase in captured rice occurred in the Fishhook area. There was no significant increase in reported weapons losses, and the increase in ammunition losses occurred in Base Area 351. The additional ammunition losses were of the following types: Grenades, Mortar rounds, Rocket rounds (107mm and larger), Rocket rounds (B40/41), Recoilless Rifle rounds and Mines.

Reported Communist Supply Losses in Cambodia

Following are the cumulative results of U.S. and ARVN operations in Cambodia. Losses are updated through 1 June 2000 hours and include both U.S. and ARVN inflicted supply losses. Cumulative losses by class of supply are as follows:

	Short Tons
Class I (food)	5,469
Class II and IV (weapons and equipment)	235 *
Class V (ammunition)	1,691 - 2,537 **
Total	7,395 - 8,241

* Including 127 tons of weapons and 108 tons of clothing, medical supplies, communications gear, personal equipment, and explosives (other than ammunition). Excludes 890 tons of vehicles and 30 tons of POL supplies. Except for weapons, tonnages are totals as of 27 May.

** The higher range includes a crating and packaging allowance.

Developments During the Past Four-Day Reporting Period
(27 May 2000 Hours - 31 May 2000 Hours)

1. The rate of supply captures diminished for each class of supply; food accounted for the most notable decrease -- almost 20 percent compared to the cumulative average daily rate of capture for that supply category.

2. Ammunition losses dropped by about 17 percent. The rate of capture increased for rifle rounds (less than 50 caliber), grenades, mortar rounds, large and small rockets, and mines. The rate of capture dropped off for machine gun rounds (50 caliber or larger), AAA rounds, and recoilless rifle rounds.

Developments During the Past 24-Hour Reporting Period

1. Food losses in BA 740 amounted to 70 tons, 60 percent of the incremental increase in this supply category.

2. Weapons losses amounted to only 3 tons, a 25 percent drop compared to the cumulative daily average. No conspicuous increase was noted in weapons captures in any of the base areas.

3. The ammunition loss rate decreased by 33 percent. Losses during the past 24-hour reporting period totaled 36 tons compared to a cumulative daily average of 54 tons. BA 351 accounted for 86 percent (31 tons) of the incremental increase. Small arms ammunition, grenades, mortar rounds, and small rocket rounds made up most of the increase in tonnage.

Developments During the Past 24-Hour Reporting Period

1. Food losses increased by 218 tons compared to a cumulative daily average loss rate of 177 tons. Food seized in Fishhook comprised 56 percent of the increase in captured food supplies.

2. For the second consecutive day weapon losses totaled 9 tons; 6 tons of this increase represented large numbers of individual and crew-served arms picked up in BA 740.

3. Ammunition losses increased by 145 tons during the past 24-hour reporting period -- 2.6 times the cumulative daily average. Ammunition losses in the Parrot's Beak comprised 50 percent of the incremental increase in ammunition losses. An increase in losses for all types of ammunition was noted in the Parrot's Beak operation.

Approved For Release 2004/11/30 : CIA-RDP78T02095R000200020001-5

Significant Developments During the Past 24-Hour Reporting Period

1. Food losses increased by only 43 tons compared to a cumulative daily average loss rate of 175 tons.

2. A large cache of crew served weapons recovered in BA 350 was primarily responsible for the upsurge in weapons tonnages -- double the cumulative daily average.

3. The rate of ammunition losses diminished from 51 tons daily to 48 tons during the past 24-hour reporting period. Capture rates dropped for all types of ammunition except mortar and recoilless rifle rounds and mines. Total ammunition losses increased by 48 tons; 37 tons of which were seized in BA 351 including large numbers of mortar and recoilless rifle rounds and 50 caliber or larger machinegun rounds.

Reported Communist Supply Losses in Cambodia

Following are the cumulative results of US and ARVN operations in Cambodia. Losses are updated through 21 May 2000 hours and include both US and ARVN inflicted supply losses. Cumulative losses by class of supply are as follows:

	Short Tons
Class I (food)	3,890
Class II (weapons)	90
Class V (ammo)	1,182 - 1,773 *
Total	5,162 - 5,753

* The higher range includes a crating and packaging allowance.

Because of field adjustments on ammunition losses, cumulative losses for all classes to date -- 5,162 tons -- are less than losses reported through yesterday -- 5,891 tons. Food losses increased by 189 tons; 112 tons of this increase represented food losses in the Fishhook area. Field adjustments effected a 917 ton reduction in ammunition losses (976 ton adjusted decrease for 50 cal. and above, AAA, and small rockets, minus 59 ton increase in other ammo losses = 917 tons). Adjusted figures include a reduction of 914 tons for 50 cal. and above ammo, a 51 ton reduction in AAA, and an 11 ton reduction in small rockets, all in BA 351. Increased losses of small arm ammo (less than 50 cal.) and recoilless rifle ammunition in BA 351 account for the bulk of the net increase in other types of ammunition losses.

21 May

Reported Communist Supply Losses in Cambodia

Following are the cumulative results of U.S. and ARVN operations in Cambodia. Losses are updated through 20 May 2000 hours and include both U.S and ARVN inflicted supply losses. Cumulative losses by class of supply are as follows:

	Short Tons
Class I (food)	3,701
Class II (weapons)	91
Class V (ammo)	2,049 - 3,149 *
Total	5,841 - 6,941

* The higher range includes a crating and packaging allowance.

The above total represents an increase of 130 tons over the report for 0 May. Food increased by 84 tons, weapons by 2 tons, and ammunition by 44 tons. The most significant increases in food captures occurred in BA 351 (30 tons) and in the Cuu Long II operation, BA 704 (27 tons). Ammunition losses were reported for the first time in BA 704. The 40 tons of ammo reportedly captured in this operation comprise most of the 44 tons increase in ammo captures.

MEMORANDUM FOR: D/I

SUBJECT : Reported Communist Supply Losses in Cambodia

1. Attached are the cumulative results of US and ARVN operations in Cambodia. Losses are updated through 11/2000 EDT (11 May) and include both US and ARVN inflicted supply losses.

a. Cumulative losses by class of supply are as follows:

	Short Tons
Class I - Food	1,846
Class II & IV - Weapons	58
Class V - Ammo	1,302 - 1,953*
Total	3,206 - 3,857

* The higher range includes an allowance for ammunition crating and packaging.

b. Supply tonnages seized in Cambodia currently total about 50 percent of supplies captured or destroyed in Operations About Face and Xieng Khouang in northern Laos last year.

c. Communist supply losses in Cambodia are currently equivalent to about 5 months supply captures in SVN during 1969.

MEMORANDUM FOR: D/I

SUBJECT : Reported Communist Supply Losses in Cambodia

1. Attached are the cumulative results of US and ARVN operations in Cambodia. Losses are updated through 10/2000 EDT (10 May) and include both US and ARVN inflicted supply losses.

2. Weapons losses continue to predominate in the Parrot's Beak and Fishhook operations. The heaviest food losses have been concentrated in the Fishhook area and in BA 702. Combined food losses in these two operations -- 1,435 tons -- constitute 80 percent of total food losses. Ammunition losses in BA 351 amount to 1,161 tons, 90 percent of the total ammunition seized in Cambodia. The recovery of over 6 million rounds of 51 calibre ammunition in BA 351 account for 975 tons of total ammunition captured in this operation.

3. A comparison of cumulative Communist supply losses in Cambodia and average 10-day supply losses in South Vietnam during 1969 is presented below.

(Short Tons)

	Cambodia	South Vietnam
Food	1,757	163
Weapons	51	12
Ammunition	1,280* - 1,920**	45* - 68**
Total	3,088 - 3,728	220 - 243

* Net.

** Gross - 1/3 gross weight; 1/2 net weight.

4. Supply losses sustained in Operations About Face and Xieng Khouang in northern Laos last year totalled 7,897 tons (1,687 tons of equipment and weapons, 1,761 tons of food, 3,824 tons of ammunition, 625 tons of POL). To date ground losses in Cambodia --

3,728 tons -- are equivalent to about 47 percent of the total supply losses in northern Laos during those operations.

5. Gross ammunition losses in Cambodia -- 1,920 tons -- are roughly equal in tonnage to total Communist ammunition expenditures in South Vietnam during 1969 (1,971 tons).

MEMORANDUM FOR: D/I

SUBJECT : Reported Communist Supply Losses in Cambodia

1. Attached are the cumulative results of U.S. and ARVN operations in Cambodia. Losses are updated through 07/0001 EDT; and include both ARVN and U.S. inflicted losses.

2. To date the most significant captures have been in the Parrot's Beak and Fishhook areas. Food and truck losses have predominated in the Fishhook area. The Parrot's Beak operation has turned up the bulk of ammunition losses, primarily due to the seizure of large numbers of 107 mm rockets, B40 and B41 rocket grenades, and 122 mm rockets.

3. A comparison of Communist supply losses in Cambodia during the past week and average weekly supply losses in South Vietnam during 1969 is presented below.

(Short Tons)

Class of Supply	Cambodia	South Vietnam
Food	913	113
Weapons	31	8
Ammunition	79	47
Total	1,023	168
